"Kids are really liking to play together with the balls. They also like the skipping ropes and hula hoops, they don't always use them the way we expected though."

"I love it! When Emily brings the cart out I always run right there so I get a ball. There's not always enough."

The cart has enabled more students to be engaged in activities outside. When new items are placed on the cart, they are a hot commodity. We just have to keep working to ensure it always comes out and the items get put back.
