

Why should I get a COVID-19 vaccine?

- COVID-19 vaccines help stop the spread of the virus and lower your chance of getting seriously ill, hospitalized or dying from COVID-19.
- The vaccine adds one more layer of protection from COVID-19 and its variants for you, your family, and your community.
- Each person who gets a COVID-19 vaccine brings us closer to community immunity, so we can get back to the things we love!

How can you help build other people's confidence in COVID-19 vaccines?

- Join the movement! Get vaccinated to help stop COVID-19.
- Encourage coworkers, family, and friends to join the movement and get vaccinated.
- Share your story:
www.IAmGettingVaccinatedBecause.com

Until enough people receive both doses of a COVID-19 vaccine, please continue to:

Maintain physical distance (2 metres) from others

Wear a face covering

Cover your cough/sneeze with a tissue or in your elbow.

Stay home if you're not feeling well

Wash your hands with soap and water for 20 seconds (or use 70% hand sanitizer)

Avoid indoor gatherings and poorly ventilated areas
