

OPIOID SURVEILLANCE SUMMARY

CK Public Health • 435 Grand Avenue West, Chatham, ON N7M 5L8
Tel: 519.352.7270 • Fax: 519.352.2166 • Email: ckpublichealth@chatham-kent.ca

SEPTEMBER 2022

This summary¹ provides local and provincial surveillance information. For some indicators, there is a lag time to receive data, so data are shown for the most recent complete month available. For more detailed provincial and local data visit [Public Health Ontario's Interactive Opioid Tool](#) and the [Ontario Opioid Indicator Tool](#).

EMERGING ISSUES & NEW RESOURCES

- The [Ontario Opioid Indicator Tool](#) has recently been updated with new indicators which have an increased focus on opioids used for the treatment of opioid use disorder, as well as complications arising from opioid-related harms. A dashboard specific to harm reduction will be available soon.
- A recently released [report](#) from Public Health Ontario focuses on Opioid Toxicity among Ontarians who worked in the construction industry.

CHATHAM-KENT ACTIVITY

EMS Calls ²	<ul style="list-style-type: none">• 6 suspect opioid overdose-related calls to CK EMS in August (53 to date in 2022) (Figure 1)• 12 non-opioid drug overdose-related calls to CK EMS in August (80 to date in 2022)
Emergency Department Visits ³	<ul style="list-style-type: none">• 5 opioid overdose-related ED visits by CK residents in August (56 to date in 2022 or 52.3 per 100,000) (Figure 1)
Deaths ⁴	<ul style="list-style-type: none">• 3 suspect drug-related deaths in CK in August (31 to date in 2022 or 28.9 per 100,000) (Figure 1)• 9 confirmed opioid-related deaths in CK between January and March 2022 (8.4 per 100,000; 16 deaths in 2021 or 15.0 per 100,000) (Figure 1)
OVERALL	<ul style="list-style-type: none">• The number of opioid-overdose related EMS calls and ED visits and suspect drug deaths in August were comparable to previous months. CK's rate of ED visits for 2022 to date is comparable to the province overall. The rate of monthly suspect drug deaths continues to be higher than the province (28.9 versus 14.4 per 100,000). For the first quarter of 2022, CK has experienced a higher rate of opioid-related deaths compared to the province (8.4 versus 3.3 per 100,000) and has one of the highest rates of all public health units.

PROVINCIAL ACTIVITY

Emergency Department Visits ³	<ul style="list-style-type: none">• 666 ED visits in August (7,463 to date in 2022 or 49.3 per 100,000)
Deaths ⁴	<ul style="list-style-type: none">• 206 suspect drug-related deaths in August (2,182 to date in 2022 or 14.4 per 100,000)• 506 confirmed opioid-related deaths between January and March 2022 (3.3 per 100,000; 2,783 deaths in 2021 or 18.7 per 100,000)
OVERALL	<ul style="list-style-type: none">• The number of ED visits is lower compared earlier spring months. Since the beginning of 2022, ED visits for the province overall have been lower compared to what was observed for most of the pandemic. The number and rate of opioid-related deaths for the province continues to increase after the second year of the pandemic.

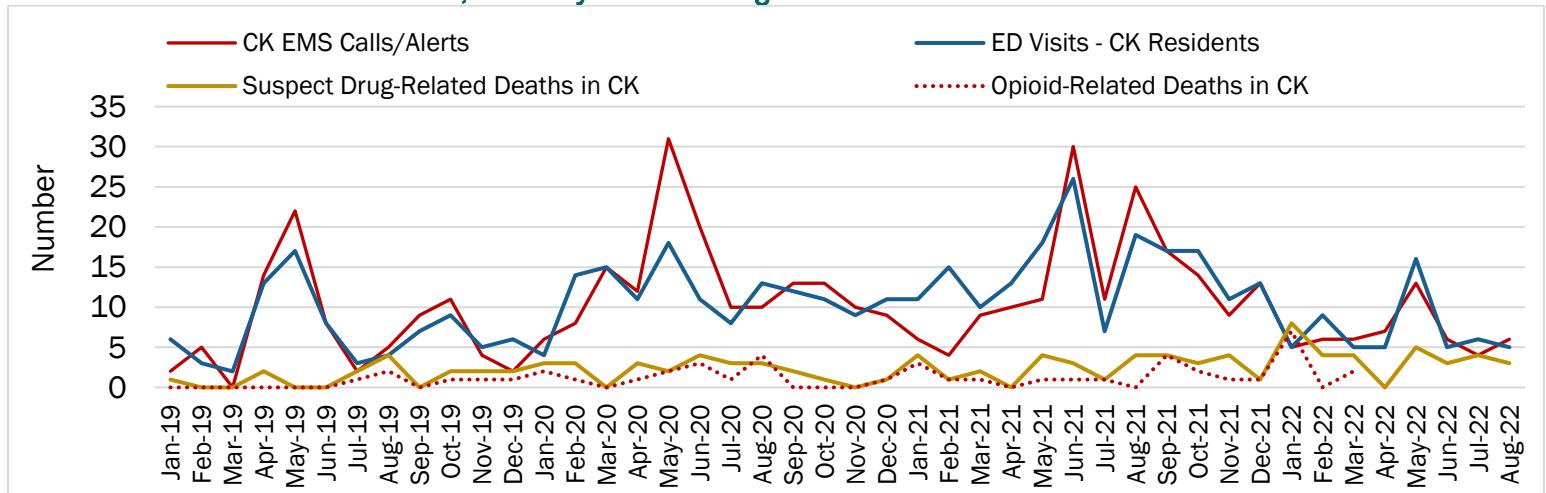

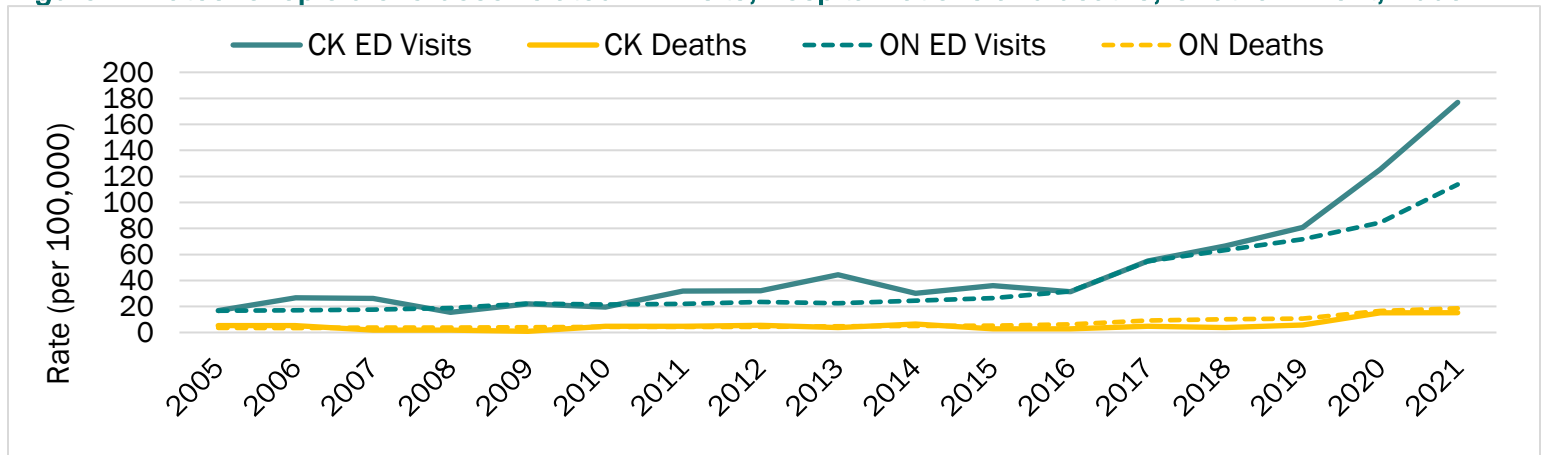

Figure 2. Rates⁴ of opioid overdose-related ED visits, hospitalizations and deaths, Chatham-Kent, 2005-21

NOTES

- ¹Content and format of this information summary has been adapted from Lambton Public Health
- ²EMS calls up to and including August 2022 are based on calls for service by month provided by Chatham-Kent EMS.
- ³Emergency department visits were provided by the Ontario Ministry of Health and Long-Term Care (Weekly emergency department visits for opioid overdose Week 24: Sept 5 to 11, 2022). All Ontario hospitals are required to report cases of opioid overdose presenting in their EDs to the Canadian Institute for Health Information. Results are considered preliminary and subject to change as emergency departments continue to submit data. Rates are based on 2021 and 2022 population projections, and 2020 population estimates.
- ⁴2019 to 2022 suspect drug-related deaths are based on the Monthly Summary table provided by the Office of the Chief Coroner for Ontario, September 9, 2022. 2020-22 opioid-related death data are based on the Coroner's Opioid Investigative Aid, April 2021 to March 2022, Office of the Chief Coroner for Ontario, July 28, 2022. 2005 to 2021 ED visits, hospitalizations and deaths were obtained from Public Health Ontario's [Interactive Opioid Tool](#). Opioid-related deaths include confirmed deaths only, are considered preliminary and are subject to change as remaining cases are closed by the Office of the Chief Coroner of Ontario.
